Common Strategies

These strategies include the most common uses of life insurance.

STRATEGY	SUMMARY	POLICIES COMMONLY USED
INCOME PROTECTION	Purchasing life insurance to replace lost income due to premature death. Settlement options are available for those looking for guaranteed income.	<ul style="list-style-type: none"> • Term Essential • WorkLife 65 • UL Protector • Essential UL • Founders Plus • VUL Protector
DEBT/LOAN PROTECTION	Purchasing life insurance to offset debts (e.g., mortgage, college loans) owed due to premature death.	<ul style="list-style-type: none"> • Term Essential • WorkLife 65 • UL Protector • Essential UL • Founders Plus • VUL Protector
COLLEGE FUNDING PROTECTION	Purchasing life insurance to replace lost college funding due to premature death.	<ul style="list-style-type: none"> • Term Essential • Return of Premium Term
LIFE INSURANCE IN RETIREMENT PLANNING (LIRP)	Placing the maximum amount of premium into a cash value accumulation policy without creating a Modified Endowment Contract (MEC) and potentially utilizing withdrawals and/or loans from the policy to supplement income during retirement.*	<ul style="list-style-type: none"> • Index Advantage UL • Custom Premier II
CHRONIC/TERMINAL ILLNESS PROTECTION NEEDS	There are clients who have concerns about becoming chronically or terminally ill when they get older. They may be concerned about who will take care of them, where they will live, how they will afford the care they need, etc. This strategy provides permanent life insurance protection with a chronic or terminal illness rider that allows them to accelerate their death benefit to help out financially once the claim is approved.	<ul style="list-style-type: none"> • UL Protector • Essential UL • Founders Plus • Index Advantage UL • VUL Protector • Custom Premier II

*Loans are charged interest; they are usually not taxable. Withdrawals are generally taxable to the extent they exceed basis in the policy. Loans that remain unpaid when the policy lapses or is surrendered while the insured is alive will be taxed immediately to the extent of gain in the policy. For policies that are Modified Endowment Contracts (MECs), distributions (including loans) are taxable to the extent of income in the policy; an additional 10% federal income-tax penalty may apply. Your clients should consult their tax advisor for advice about their own situations.

Asset Repositioning/Leveraging

All of these strategies involve the repositioning of assets that are not needed for retirement and that are not being used for day-to-day living expenses.

STRATEGY	SUMMARY	POLICIES COMMONLY USED
ACTIVATE YOUR ASSETS	Involves the idea of repositioning certificates of deposit. Such monies could be repositioned to life insurance to create, enhance, or leave a legacy.	<ul style="list-style-type: none"> • Essential UL • Founders Plus • VUL Protector • SIUL
ASSET PROTECTION+	Involves the idea of repositioning assets which may be tax inefficient from a wealth transfer perspective (e.g., IRAs and annuities). IRAs and annuities are subject to income taxes at death, which may make them inefficient from a wealth transfer perspective. Such assets (after taxes and/or surrender charges) or a portion of the income from such assets may be repositioned to life insurance to create, enhance, or leave a legacy.	<ul style="list-style-type: none"> • UL Protector • Essential UL • Founders Plus • VUL Protector • SUL Protector • SIUL
BRINGING STOCK TO LIFE	Involves the idea of repositioning a portion of a concentrated stock portfolio. This concept does not discuss any particular stock or security. Rather, it focuses conceptually on repositioning a portion of monies generated by diversification strategies to a life insurance policy to reduce the amount of market volatility for assets earmarked for a client's legacy planning.	<ul style="list-style-type: none"> • UL Protector • Essential UL • Founders Plus • VUL Protector • SUL Protector • SIUL • SVUL Protector
CHARITABLE PLANNING	In the asset repositioning/leveraging context, charitable planning typically involves using life insurance in a variety of ways primarily to enhance or leverage the amount of money ultimately passing to charity. Where traditional measures of economic loss may not be present in the facts and where the case may not fit Prudential's traditional underwriting guidelines, the charitable planning case may be considered a leveraged gifting type of case and may be considered under the asset repositioning/leveraging underwriting guidelines. Therefore, it is included in this list of concepts.	<ul style="list-style-type: none"> • UL Protector • Essential UL • SUL Protector • SIUL • SVUL Protector
COMPLETE THE DREAM	Involves the idea of repositioning a portion of assets (after taxes and/or surrender charges) with the goal of reducing the amount of market volatility for assets earmarked for a client's legacy planning.	<ul style="list-style-type: none"> • UL Protector • Essential UL

If the asset or income being repositioned becomes fully exhausted, premiums may have to be paid using other assets or income to keep the life insurance policy in force.

Legacy Planning

These strategies are focused on efficiently transferring wealth to a spouse or children, though it could also be to a charity.

STRATEGY	SUMMARY	POLICIES COMMONLY USED
ACCESS TRUSTS	Irrevocable trust with provisions permitting distributions to non-grantor spouse.	<ul style="list-style-type: none"> • Essential UL • Founders Plus • Index Advantage UL • VUL Protector • Custom Premier II • SIUL • SVUL Protector
CHARITABLE REMAINDER TRUST (CRT) WITH WEALTH REPLACEMENT	Customers will make gifts of highly appreciated property (e.g., stock) to a charitable remainder trust. They receive income from the CRT for a term of years or for life. The remainder passes to charity. To replace the wealth gifted away, the customer will sometimes establish an irrevocable trust, which will purchase life insurance.	<ul style="list-style-type: none"> • UL Protector • Essential UL
ESTATE PLANNING	Purchasing life insurance to offset estate tax liabilities.	<ul style="list-style-type: none"> • UL Protector • Essential UL • Founders Plus • VUL Protector • SUL Protector • SIUL • SVUL Protector
ROTH IRA PLANNING	Involves general discussions of (1) the benefits of Roth IRAs, (2) comparisons of conversion options regarding traditional IRAs to Roth IRAs, (3) modeling the general tax impacts that may be involved in the conversion, and (4) discussing how life insurance can be integrated into overall planning and can be used to provide an enhanced legacy to heirs.	<ul style="list-style-type: none"> • UL Protector • Essential UL • Founders Plus • VUL Protector • SUL Protector • SIUL • SVUL Protector
SPECIAL NEEDS	Irrevocable trust designed to supplement governmental benefits, usually holding life insurance as a funding vehicle.	<ul style="list-style-type: none"> • UL Protector • Essential UL • SUL Protector • SVUL Protector

Business Strategies

These strategies involve using an individual life insurance policy to protect or strengthen a business.

STRATEGY	SUMMARY	POLICIES COMMONLY USED
BUY/SELL	Purchase of life insurance to fund obligation created by agreement to purchase a business interest.	<ul style="list-style-type: none"> • Term Essential • PruTerm One (for short term) • UL Protector • Essential UL • Founders Plus • VUL Protector • Custom Premier II
ESTATE EQUALIZATION	Purchasing life insurance for children who will not inherit the business or farm.	<ul style="list-style-type: none"> • UL Protector • Essential UL • Founders Plus • VUL Protector • SUL Protector • SIUL • SVUL Protector
EXECUTIVE BONUS/ RESTRICTIVE EXECUTIVE BONUS	Business provides bonuses to executive who, in turn, purchases a life insurance policy.	<ul style="list-style-type: none"> • Essential UL • Index Advantage UL • VUL Protector • Custom Premier II
KEY PERSON	Business purchases life insurance to protect against the loss due to premature death of a key person.	<ul style="list-style-type: none"> • Term Essential • PruTerm One (for short term) • UL Protector • Essential UL • Founders Plus • Index Advantage UL • VUL Protector • Custom Premier II
PRIVATE FINANCING & SPLIT DOLLAR**	Premium-sharing arrangement used by employers to finance insurance purchase.	<ul style="list-style-type: none"> • UL Protector • Essential UL • Founders Plus • VUL Protector • Custom Premier II

**The Sarbanes-Oxley Act makes it a crime for publicly traded companies to, directly or indirectly, enter into a loan with certain directors and officers. It is unclear whether the Act applies to split dollar arrangements. Clients should contact their tax or legal advisors for the most recent developments.

¹ There are no extended or exception issue ages.

² Product and rate availability can vary by state. Minimum age may vary by face amount.

³ All benefits, riders, and product features may not be available in all states. Additional limitations may apply based on age and underwriting. Some riders are available at an additional cost.

⁴ The Living Needs Benefit is an accelerated death benefit and is not a health, nursing home, or long-term care insurance benefit and is not designed to eliminate the need for insurance of these types. There is no charge for this rider but, when a claim is paid under this rider, the death benefit is reduced for early payment, and a \$150 (\$100 in Florida) processing fee is deducted. If more than one policy is used for the claim, each policy will have a processing fee of up to \$150 deducted (\$100 in Florida). Portions of the Living Needs Benefit payment may be taxable, and receiving an accelerated death benefit may affect your client's eligibility for public assistance programs. The federal income-tax treatment of payments made under this rider depends upon whether the insured is considered "terminally ill" or "chronically ill" and, if the policy is business related, whether the insured is receiving the benefits. We suggest that your clients seek assistance from a personal tax advisor regarding the implications of receiving Living Needs Benefit payments. This rider is not available in Minnesota to new purchasers over age 65 until the policy has been in force for one year, and the nursing home option is not available in California, Connecticut, Florida, Massachusetts, New York, or the District of Columbia. **This rider is not available in Washington state.** In Oregon, term policies must include the waiver of premium benefit to be eligible for this rider.

⁵ Consideration will be given for face amounts as low as \$200,000. You should submit an inquiry to Underwriting before submitting an insurance request on an individual over age 80 for guidance on whether the risk may be considered. If the case can be submitted, requests between \$200,000 and \$249,999 must be submitted using the paper application.

⁶ PruLife Universal Plus and PruLife Custom Premier II policies using Death Benefit Option C require a minimum face amount of \$250,000.

⁷ The BenefitAccess Rider is an optional rider that accelerates the life insurance death benefit when the insured is terminally ill or is chronically ill and otherwise meets the terms of the rider. It is not Long-Term Care (LTC) insurance. Benefits received under the rider will reduce and may deplete the death benefit. Electing this rider results in an additional charge and underwriting requirements. Some benefit payments may be subject to a fee. Other terms and conditions apply and can vary by state. Clients should consult their tax and legal advisors.

For New York contracts: Please also note the rider is not subject to the minimum requirements of New York law, does not qualify for the New York State Long-Term Partnership Program, and is not a Medicare supplement policy. In addition, receiving accelerated death benefits may affect clients' eligibility for public assistance programs and such benefits may be taxable. Benefit payments may be made only if the payments are subject to favorable federal tax treatment. When determining whether the benefit payments will receive favorable tax treatment, the payment of benefits from all insurance policies must be considered. Benefit payments may be reduced or unavailable if they are expected to exceed the maximum amount eligible under Internal Revenue Code Section 101(g)(1) and all other applicable sections of federal law.

For most Connecticut contracts: To be eligible for chronic illness benefits, your client must also have been confined in a home or institution for at least 6 months previously. This confinement must have been illness related. It also must be expected to continue for life.

⁸ The Overloan Protection Rider is available only on policies with GPT. Please note that the Internal Revenue Service (IRS) has not ruled on the tax consequences associated with exercising the rider or whether loans in excess of cash value may be treated as taxable distributions.

¹⁰ The potential to build cash value in the Indexed Accounts and Plus 100 Account is based on the performance of the S&P 500[®] Index (using an Index Growth Cap, Multiplier, and Spread as applicable, and Floor) on an annual point-to-point basis based on a 100% participation rate (subject to change). Money that is placed in the Indexed Accounts is not a direct investment in the S&P 500[®] Index. The Index Growth Cap and Spread are generally stated as a percentage. The Growth Cap is the maximum rate of interest that may be credited at the end of the one-year Index Segment Duration, regardless of changes to the S&P 500[®] Index for the Indexed Account and the Plus 100 Account. The Multiplier is the amount that the earned rate on the Indexed Account with Multiplier will be multiplied by after applying the Cap for the Indexed Account with Multiplier. The Spread is the percentage that will be deducted from the earned rate on the Uncapped Indexed Account subject to the Floor.

The Index Growth Cap, Multiplier, and Spread are declared for each Index Segment and Indexed Account option as applicable in advance of each Index Segment Duration. The Index Growth Cap, Multiplier, and Spread are subject to change at our discretion, both up and down, but are guaranteed never to be less than 3.00% for the Cap on the Indexed Account, 3.00% for the Cap on the Plus 100 Account, 2.75% for the Cap on the Indexed Account with Multiplier, and 1.15 for the Multiplier, or more than 30% for the Spread. Changes to the Index Growth Cap, Multiplier, and Spread could result in different values. Changes are not tied to the performance of the S&P 500[®] Index and may be based on interest rates, market volatility, and other factors. Once an Index Segment is created, its Index Growth Cap, Multiplier, and/or Spread will not change. Index Growth Caps, Multiplier, Spreads, and Floors may be different in certain states. If amounts in an index segment are withdrawn during the segment duration, they can still earn index interest at segment maturity, pro-rated based on the amount of time they were in the segment.

These comparisons highlight some of the many features and benefits of our products. Your clients should carefully consider all of the features and benefits of a product before purchasing.

Overfunding may cause a policy to become a Modified Endowment Contract, and there may be tax consequences.

A policy's cash value may not be guaranteed and can change. Life insurance policy values are accessed through loans and withdrawals. Loans and withdrawals will reduce the policy's cash value and death benefit and may have tax consequences. Face amounts are subject to our retention limits. Face amounts in excess of our retention limits will be considered on a case-by-case basis, subject to the availability of reinsurance.
